Materials of Martin Anderson
among Nixon Presidential Materials, 1968-71

The Presidential historical materials of Martin Anderson are in the custody of the National Archives and Records Administration under the provisions of Title I of the Presidential Recordings and Materials Preservation Act of 1974 (PL 93-526, 88 Stat. 1895) and implementing regulations. In accordance with the act and regulations, archivists reviewed the file group to identify personal and private materials (including materials outside the date span covered by the act) as well as nonhistorical items. These materials have been returned to the individual who has primary proprietary interest.

Materials covered by the act have been archivally processed and are described in this register. Items which are security classified or otherwise restricted under the act and regulations have been removed and placed in a closed file. A Document Withdrawal Record (GSA Form 7279) with a description of each restricted document has been inserted at the beginning of each folder from which materials have been removed. A Document Control Record marks the original position of the withdrawn item. Employees of the National Archives will review periodically the unclassified portions of closed materials for the purpose of opening those which no longer require restriction. Certain classified documents may be declassified under authority of Executive Order 12356 in response to a Mandatory Review Request (GSA Form 17277) submitted by the researcher.
